

Create a Legacy for LA Greenbuild & Beyond

The Eco-Tech Maker Space

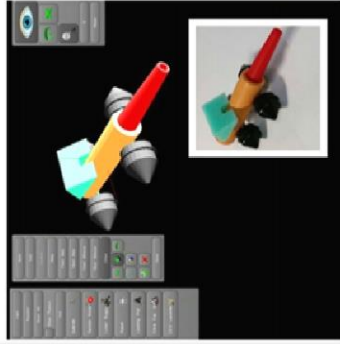

Our Gift to Los Angeles...

Execution of 2016 Greenbuild Legacy Project, Eco-Tech Maker Space, is underway and slated to be unveiled Sunday, October 2nd as part of the conference kick-off. The Eco-Tech Maker Space project is offered by T4T.org to ensure local youth have access to the technologies and platforms that can put them on a path to green building, design and engineering.

Eco-Tech Maker Space will be based in manufacturing-heavy Gardena and offer the community S.T.E.A.M. (Science, Technology, Engineering, Art, Math) curricula, hands-on problem solving, and environmental stewardship emanating from the reuse of discarded, safe manufacturing materials. The project team is working to create the physical space for youth to thrive and the greater community to learn with S.T.E.A.M. concepts and tools.

With the world's largest conference and expo dedicated to green building coming to L.A., there is no better time to help secure its future by sponsoring the Los Angeles Legacy Project. By supporting the Eco-Tech Maker Space you can help ensure the Los Angeles community continues to lead green!
